POSTOPERATIVE INSTRUCTIONS FOR AC LIGAMENT RECONSTRUCTION (WEAVER-DUNN)

Dressing: A dressing has been applied to your incision. The dressing may become moist from blood or drainage this is not a cause for alarm. However, if the drainage from the incision soaks through the dressing please call the office. **This dressing may be removed in 5 days .** The incision may be left open to air, or, a small dressing applied if there is still some drainage.

Sling & Ice Cuff: The sling is worn for your comfort and protection. **The sling should be worn at all times(even while sleeping) except for showering and during exercises.** The ice cuff is worn to minimize swelling and pain. It should be worn for the first 3 days, 3 hours on, 3 hours off, for comfort.

Wounds: Your wound should be kept clean and dry. You may shower once the dressing has been removed, unless otherwise directed by your physician.

Activity: **Work on elbow motion and pendulum exercises three times daily. No use of the arm except for these exercises.**

Pain: Upon discharge from the hospital you should have a prescription for pain medication. Please take the pain medication with food. Follow the guidelines in the pain management protocol for using your medication or as directed by your physician. Do not drink alcoholic beverages or drive if your are using pain medications.
